PHASE 2

FEET Labs is proud to welcome all FEET into the crypto community! Our mission is to empower those who revel in their love for FEET, and we will continue to do so by launching new collections and tokens through various side chains and L2 solutions. Our ultimate goal is to become the largest community in the crypto space, and we plan to achieve this by introducing six new deflationary collections for our FEET community.

Airdropping the next 6 collections

Reached supply goals in FEETPIX NFTs, FEET labs will airdrop the second collection and publish the following goals to unlock the third. The next collections and their deflationary tokens will be airdropped in different Ethereum-compatible chains to attract more users and communities. All of the next collections and tokens will have rewards for existing holders of any previous collections and tokens!

PHASE 3

Get ready for the final leg of our journey as we prepare to airdrop the highly-anticipated FEET PFP collection. This collection allows you to express your love for feet through your pixelated profile picture.

But that's not all - the DAO, fueled by 50% of the royalties from each collection and marketing fees.

This innovative platform will empower the FEET community to act as the largest venture capitalist in the industry, driving the next bull run in a feet-oriented direction. Moreover, the DAO will provide our community rewards and feet-incentives for participation.
